

# Eway Configuration Settings

Configuration settings can be entered in the CMS for these current Eway methods:

- Eway Secure Fields (Direct Connection API)
- Eway Responsive Shared Page

- You need to have the relevant Eway API key from your Eway Business Centre interface.
- For both the Secure Fields and Responsive Shared Page solutions, please provide the Public API Key and Eway API Key. See: [Get Eway API Key](#).
- **NOTE** - If you are changing your site's Eway method, a [new API key](#) needs to be generated.

eWAY settings are configured on the Payment Provider page.

1. In the CMS, navigate to **Settings Settings Feature Management Payment & Checkout**.
2. If not enabled, toggle **ON Payment Provider**.
3. Click **Configure**.
4. In **Provider Selection**, select the eWAY method required.
5. Change any configuration settings required.
6. Click **Save** or **Save & Exit**.

## Eway Configuration Settings Fields

**NOTE** - These fields have usually been populated during setup. If you are changing between Sandbox and Production, ensure you change to the correct Keys and Password.

Field	
Public Key	Eway Public API Key generated (for Pay Now Buttons on your site)
Credit Card Capture Password	Password generated in your Eway account
Eway API Key	API Key generated in your Eway account
Eway Script Url	Defaults to: <a href="https://secure.ewaypayments.com/scripts/eCrypt.min.js">https://secure.ewaypayments.com/scripts/eCrypt.min.js</a>
Credit Card Capture Funds	Default: 0
Eway Billing Country	Two digit code of your business billing country
Hide CC Security Code	<i>This field is not used with this method.</i> The card card security number will always be masked.
Enable Payment Provider Customer ID Token Retention	Allow card to be saved for future use with an Eway-issued ID
Additional fields for Eway Responsive Shared Page	
Charge Type	(For credit card surcharge) Charge type if surcharge used
