

Keep Me Logged In

Overview

The 'Keep Me Logged In' functionality allows users the option to remain logged in, overriding the usual session timeout period. A user who ticks this option won't need to log back in with their credentials next time they visit the site, unless they've exceeded the maximum period determined by you.

Allow users to remain logged in, overriding the usual session timeout period.

A user who ticks this option won't need to log back in with their credentials next time they visit the site, unless they've exceeded the maximum period determined by you. Enabling this function is quick and easy, and is detailed below.

The screenshot shows a login modal window titled "Login" with a close button (X) in the top right corner. It features two input fields: "Username / Email *" containing "test@commercevision.com.au" and "Password *" containing "Your Password". A link "Forgot Your Password?" is located to the right of the password field. Below the fields are two checkboxes: "Remember email" (checked) and "Keep Me Logged In" (unchecked), with a red arrow pointing to the latter. A blue "Login" button is positioned below the checkboxes. At the bottom, there is a message: "Don't have an account with us? No problem. Register now - it's quick and easy!"

Implementation

To enable the 'Keep Me Logged In' feature:

1. Login to the CMS.
2. Navigate to **Settings** --> **Settings**.
3. Search for the system setting '**Expiry day limit for auto login cookie**'.
4. Set the value to the max number of days you wish to allow users to remain logged in.

Expiry day limit for auto login cookie :

5. Click '**Update**' to save changes.
6. Refresh your site's login page. The 'Keep Me Logged In' option should now appear above the Login button.

Customisation

Updating the prompt text that appears beside the tickbox is also a snap. The widget to edit depends on the login method used on your site - Classic login page or Login Logout Modal window?

To edit wording on the classic login page:

1. Login to the CMS.
2. Navigate to **Content** --> **Standard Pages**.
3. Select the **Login Page** template.
4. Click '**Edit**' on the **Login widget**.

5. Locate the **'Keep Me Logged In Prompt'** field and update the text as required.
6. Click **'Save'**.
7. Refresh your site's login page - the change should be visible immediately.

To edit wording on the modal window:

1. In the CMS, navigate to **Content Theme Layout**.
2. On the **Login Logout Modal widget**, click **Edit**.
3. Locate the **Keep Me Logged In Prompt** field and update the text as required.
4. Click **Save**.
5. Refresh your site's page and click **Login** to launch the modal window - the change should be visible immediately.
