# Order Field Static Widget

Widget Use
Renders an additional order field in email templates.

Example of Widget Use

Order confirmation email with field: 'DeliveryMethodClickAndCollect' added before the address. The prompt ''Click & Collect'' and field data 'Pickup' acts as header for the store address.

Where can the Widget be placed?

The widget can be used in the following templates:

- Order-related email templates, e.g., Order Confirmation, Order Placed, Order Received

Widget Options

Please note - where no data is available, the field and its prompt will not render.

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	This description is added to the widget title. It makes the widget's use clear on the template page.	All
Layer	Layer the widget is valid for.	Use layering to limit widget content to certain groups of users. To use the same widget for more than one user group but with different options set, add the widget as many times as needed in the same zone. Then add layering to define the user group each time.	All
Order Field Name	What field data displayed is from.	Available fields are from the Sales Order table.	4.20.00
ShowPrompt?	Whether a label is displayed for the field in the email message.	Default: disabled Toggle to enable	4.20.00
Field Prompt	Text for field label.	Only when ShowPrompt? is enabled.	4.20.00
Fallback information	What to display if order field has no data.	Leave blank , the field will be ignored	4.20.00
