

Copy Page Template to Create Static Page

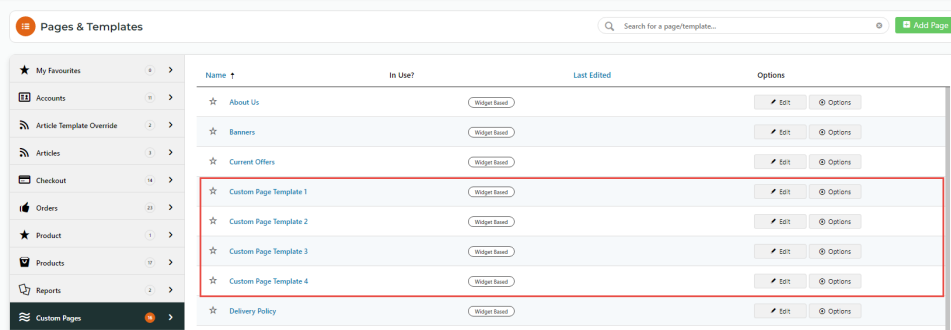

In the CMS, you can copy a page template to create your own page based on the example content.

Some Custom Page Template examples may have be available in the CMS. Think of these as "master" templates that you can start with.

1. In the CMS, go to **Content Content Pages & Templates**.
2. Click the **Custom** tab.

3. Find the Custom Page Template examples.

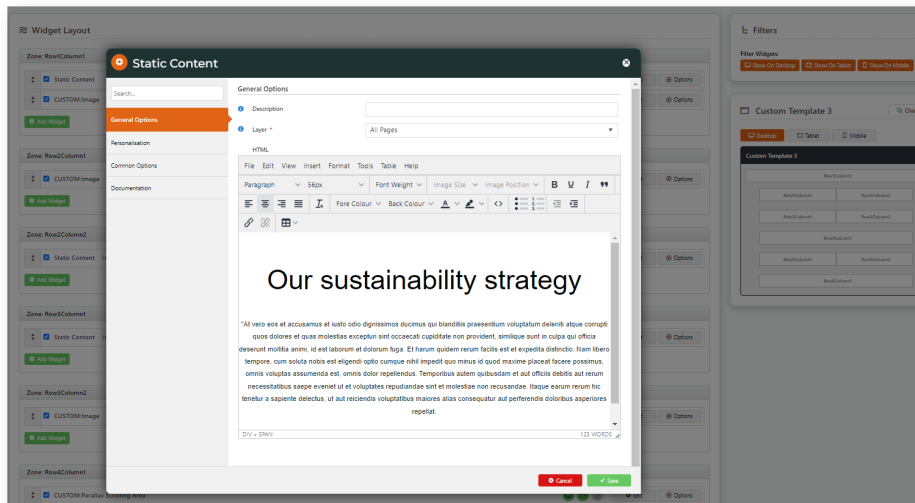

4. Hover over **Options** for the template and select **Copy**.

5. Edit fields of the copied page.

6. Configure widgets as you need.

7. Save the new page.

You now have a new page that has a design consistent with the master template.
