

Flyer Creation Widget Library

- [Customer Contact Details Widget](#) — Renders standard contact information (such as address, phone, and email) on the PDF generated via the Flyer Creator.
- [Customer Logo Widget](#) — Renders the customer logo (for the logged in customer) on the PDF generated via the Flyer Creator.
- [Flyer Creator Widget](#) — Renders the Flyer Creator interface and controls preferences such as Profit Calculation method and addresses override. Also used to customise button and field labels on the Flyer Creator page.
- [Flyer Price Widget](#) — Renders the product price on the Flyer PDF.
- [Flyer Product List Grid Widget](#) — Renders the product section of the PDF flyer. The contents of this section are determined by the flyer layout selected, and the item configuration used by that layout.
- [PDF Flyer Style Sheet Widget](#) — Acts as the 'theme layout' for PDF flyers generated via the Flyer Creator. The style sheet sets the header and footer colours, logo placement, and contact details layout.
