

Product Quick View Popup Widget

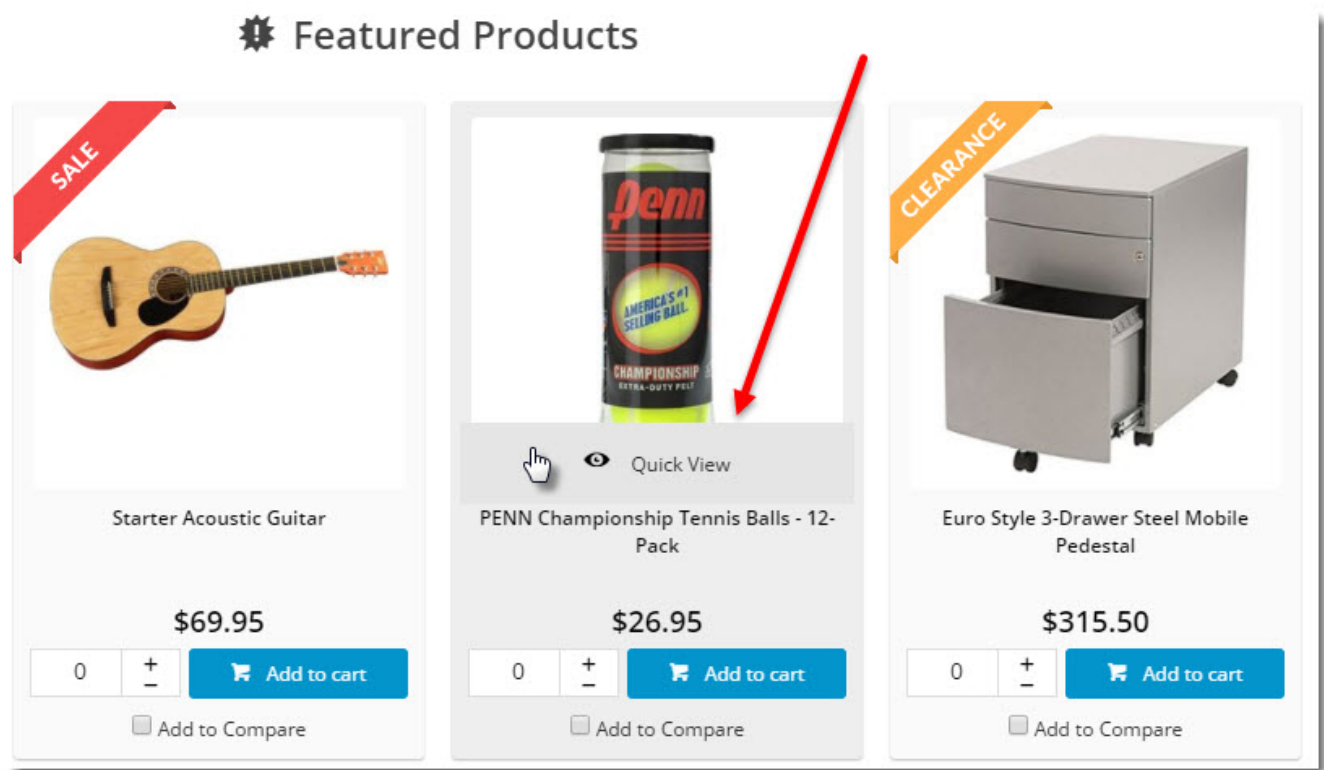

(Formerly known as the Product Quick View Modal widget)

Widget Use

Renders the 'Quick View' button on products in a list. Clicking the Quick View button launches a pop-up with product detail and an add to cart button. (Pop-up content is widget-based and configurable).

Example of Widget Use

Following is an example of the widget in use:

Where can the Widget be placed?

The widget can be used in the following templates:

- Product List Item Zoned Template

Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommend this field be updated so the widget's purpose is clear at a glance from the template page.	All

Layer	The layer the widget is valid for.	<p>The layering technology allows for the content to be shown to specific audiences.</p> <p>This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience, but different configuration is needed.</p> <p>The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.</p>	All
Quick View Button Text	The text on the Quick View button.	Default is: Quick View	3.97

Implementation Guide
