Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommended this field be updated so the widget's purpose is clear at a glance from the template page.	All
Layer	The layer the widget is valid for.	The layering technology allows for the content to be shown to specific audiences. This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience, but different configuration is needed. The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.	All

Heading	The text displayed on the Submit button.	Default is: Fault Information	3.95
Heading Icon	The icon displayed next to the heading text.		3.95
Display Field Group Heading	Determines whether the Field Group's Description is displayed as a subheading within the fault information section of the form.	Default is: disabled	3.95
		Tick to enable
