

Product Variant Grid

How does it work?

To let your customers select multiple variants of a Master product, add a [Product Variant Grid Widget](#) to the **Product Detail Template** or the **Product List Item Zoned Template** or both. In the format of a grid, all available product variant options such as size and colour are easy to see and select.

Step-by-step guide

You can use the Product Variant Widget in multiple locations. Adding this widget changes what the customer sees.

1. Configure Settings in CMS

1. In CMS, go to **Settings Settings Feature Management Products & Categories**.
2. Enable **Product Variants** and click **Configure**.

Feature Management

Feature	Available in CMS	Options
Cluster LineType Maintenance <small>Maintain Cluster LineType information online.</small>	<input checked="" type="checkbox"/>	Configure
Cost Centres <small>Configure Cost Centre options for your website.</small>	<input checked="" type="checkbox"/>	Configure
Custom Catalogues <small>Create web-based catalogues for specific customers.</small>	<input checked="" type="checkbox"/>	
Integrated Category Maintenance <small>Integrate your category structure from PRONTO, but maintain additional category content online (such as images).</small>	<input type="checkbox"/>	
Most Popular Products <small>Enable Most Popular Products functionality (in conjunction with Baywatch).</small>	<input checked="" type="checkbox"/>	Configure
Online Category Maintenance <small>Maintain all category information online (e.g. category structure as well as additional content).</small>	<input checked="" type="checkbox"/>	Configure
Product Documents <small>Maintain product documents.</small>	<input checked="" type="checkbox"/>	Configure
Product Features <small>Configure product feature options.</small>	<input checked="" type="checkbox"/>	Configure
Product Maintenance <small>Maintain product information online, such as ribbons, alternates, accessories, and notes, for example.</small>	<input checked="" type="checkbox"/>	Configure
Product Media <small>Maintain product media online, such as video and images.</small>	<input checked="" type="checkbox"/>	Configure
Product Variants <small>Configure product variant options.</small>	<input checked="" type="checkbox"/>	Configure
Quick View <small>Enable Quick View functionality using the Product Category Product Summary widget.</small>	<input checked="" type="checkbox"/>	Configure

3. In **Product Variant Settings**, enable **Allow Product Matrix Mode**.

Enforce Stock Security for Variants

Update Master Products With Child Images

Allow Manual Sort Of Product Attributes

4. To save the settings and close the window, click **Save & Exit**.

2. Add Product Variant Grid widget to Product Detail Template

By adding the Product Variant Grid widget to the Product Detail Template, the grid will be displayed when a customer clicks on a Master product.

1. Go to **Content Pages & Templates**.
2. Select **Products**, then the **Product Detail Template**.
3. Add the **Product Variant Grid** widget into the same zone as the 'Product Purchase Details' and 'Product Field' widgets. In our example, that is the **Zone:MainRight** area. To add the widget, in the zone, click **Add Widget** and find and select the **Product Variant Grid** widget.
4. Once added, the widget's settings window is displayed. You do not have to configure the fields for the widget to work but we recommend adding a meaningful description in **Description**. (See [help for the Product Variant Grid widget](#) to edit other

fields.) We also recommend toggling OFF the **Show Heading?** button so that the product variant grid displays automatically, encouraging buyers to use this easy selection method.

3. If **Show Heading?** is ON in the Product Variant Grid widget, then the grid is not automatically displayed. The user has to click on the Heading Text to open it. If **Show Heading?** is OFF, the grid is automatically displayed.
4. If the customer wants to buy a product, they just need to click the + sign next to each variant combination they require or just type in the number they want.

5. To add the variants to their order, they click **Add selected to cart**.

Product Variant Grid Widget and the Product List Item Zoned Template

The display your customer will see changes dramatically when you add the Product Variant Grid Widget to the Product List Item Zoned Template.

1. Navigate to **Content Pages & Templates**
2. Select **Products**.
3. Edit the **Product List Item Zoned Template**.

4. Select a zone in which to add the 'Product Variant Grid Widget'. In our example, we added it to the Column2Left zone.
5. Add the widget to this zone and edit the fields as needed and save any changes. The widget is now in your Product List Item Zoned Template.
6. Click **Publish** to effect your changes on your website.

What will your customer see?

- In LIST view, your customer can select the product variations and add to their cart all from the search results window.

- In GRID view, the selection is not available as the display allocated to each product in grid mode doesn't leave much room, but it enables your customers to see, at a glance, what variations are available for the product.

Based on the discrepancy in display, you may want to disable the Product Variant Grid from displaying in List and Grid mode and only show when the customer clicks on the product. In this case, DO NOT add the widget to the **Product List Item Zoned Template**.

Troubleshooting: Not seeing the GRID?

If you have configured the settings for Product Variant Grid but you do not see the GRID in a Master product, follow these steps:

1. Navigate to **Products & Categories Product Maintenance**.

2. Search for your Master Product. In our example, we will search for **High Visibility Waterproof Safety Trousers**.

The screenshot shows the 'Product Maintenance' interface with a search bar containing 'High Visibility'. Below the search bar is a table of search results. The first row, with product code 'CV148', is highlighted with a red border. The table columns are 'Product Code', 'Title', 'Description', and 'Edit'.

Product Code	Title	Description	Edit
CV148	High Visibility Waterproof Safety Trousers	High Visibility Waterproof Safety Trousers	Edit
CV148	High Visibility Waterproof Safety Trousers	High Visibility Waterproof Safety Trousers	Edit
CV148	High Visibility Waterproof Safety Trousers	High Visibility Waterproof Safety Trousers	Edit
CV227	Heavy Duty Rain Jacket, High Visibility	Heavy Duty Rain Jacket, High Visibility	Edit
CV228	Heavy Duty Rain Bib, High Visibility	Heavy Duty Rain Bib, High Visibility	Edit
CV300	High Visibility Waterproof Safety Trousers, Small	High Visibility Waterproof Safety Trousers, Small	Edit

3. Scroll to the bottom until you locate the **Master Product** section.

4. Ensure **Product Matrix Mode** is enabled.

The screenshot shows the 'Maintain Product' page for 'CV148 - High Visibility Waterproof Safety Trousers'. The 'Product Matrix Mode' toggle is highlighted with a red box. Below it is the 'Child Products' section, which includes a search bar and a table of child products.

Active	Product Code	Variants	Apply As Note Line	Options
<input checked="" type="checkbox"/>	CV500	Size: Small Colour: Yellow	<input type="checkbox"/>	Remove <input checked="" type="checkbox"/> Default Child
<input checked="" type="checkbox"/>	CV500	Size: Small Colour: Red	<input type="checkbox"/>	Remove <input checked="" type="checkbox"/> Set As Default Child
<input checked="" type="checkbox"/>	CV501	Size: Medium Colour: Yellow	<input type="checkbox"/>	Remove <input checked="" type="checkbox"/> Set As Default Child
<input checked="" type="checkbox"/>	CV501	Size: Medium Colour: Red	<input type="checkbox"/>	Remove <input checked="" type="checkbox"/> Set As Default Child
<input checked="" type="checkbox"/>	CV502	Size: Large Colour: Yellow	<input type="checkbox"/>	Remove <input checked="" type="checkbox"/> Set As Default Child

5. Click **Save and Exit**

Contact [Commerce Vision](#) if you still have problems.

Additional Information

The [Product Variant Grid Widget](#) is best suited to the Product Detail Template. You can choose to add it to the Product List Item Zoned Template, acknowledging that product variant selection is not available when the product search results view is in grid mode.

Minimum Version Requirements	4.13.00
Prerequisites	Enable "Allow Product Matrix Mode" in Product Variant Settings
Self Configurable	Yes
Business Function	Products & Categories

BPD Only?	Yes
B2B/B2C/Both	Both
Third Party Costs	N/A
CMS Category	Pages & Templates
