Login Widget
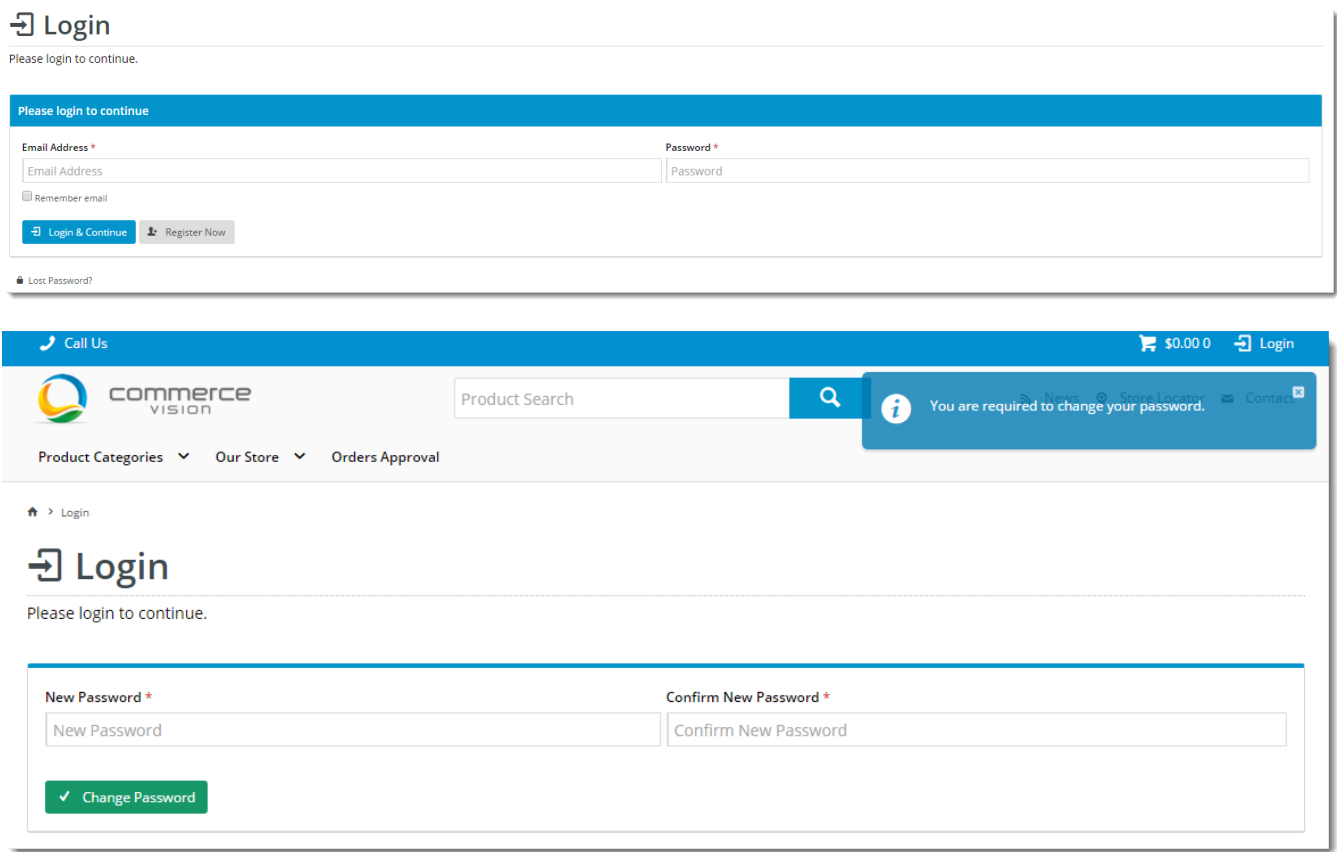

Widget Use

Displays the user login panel on your website.

Example of Widget Use

Following is an example of the widget in use:

Where can the Widget be placed?

The widget can be used in the following templates:

- Login Page Template

Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommended this field be updated so the widget's purpose is clear at a glance from the template page.	All

Layer	The layer the widget is valid for.	The layering technology allows for the content to be shown to specific audiences. This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience, but different configuration is needed. The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.	All
Title	The heading text displayed at the top of the widget.	Default is: Please login to continue	All
User Name Prompt	The label and placeholder text for the username field.	Default is: Email Address	All
Password Prompt	The label and placeholder text for the password field.	Default is: Password	All
Show Remember Me?	Determines whether the 'Remember Me' tickbox is displayed.	Default is: ticked Untick to disable	All
Remember Me Prompt	The label displayed next to the 'Remember Me' tickbox.	Default is: Remember email	All
Keep Me Logged In Prompt	The label displayed next to the 'Keep Me Logged In' tickbox.	Default is: Keep me logged in	3.78
Login Button Prompt	The text displayed on the Login button.	Default is: Login & Continue	All
Password Requires Change Message	The message displayed to the user when a change of password is required. (For example, a new B2B user created by Customer Service, supplied with a temporary password, and required to change their password on first login.)	Default is: You are required to change your password	All
New Password Prompt	The label and placeholder text for the new password field during a password change.	**Note** - this applies when the password is set to force change by the user upon login. Default is: New Password	All
Confirm Password Prompt	The label and placeholder text for the confirm password field during a password change.	**Note** - this applies when the password is set to force change by the user upon login. Default is: Confirm Password	All
Notification Email Prompt	The placeholder text displayed in the notification email input box.	**Note** - this field will only display when the user's login ID is not in email address format. The system will prompt the user to enter an email address for notifications. Default is: Notification Email Address	All
Change Password Button Prompt	The text displayed on the Change Password button.	Default is: Change Password	All
Change Password Button Icon	The icon displayed to the left of the Change Password button text.	Default is: cv-ico-general-cycle Select via drop-down	All
Password Changed Message	The message displayed to the user when they have successfully reset their password.	Default is: Password changed	All
Enter Password Message	The message displayed when the user clicks the Change Password button without first entering a password.	Default is: Please enter a password	All
Show Self Register?	Determines whether the Register button is displayed.	Default is: ticked Untick to disable	All
Register Icon	The icon displayed to the left of the text on the user registration button.	Default is: cv-ico-general-user-add Select via drop-down	All
Register Prompt	The text displayed on the user registration button.	Default is: Register Now	All
Show Forgot Password?	Determines whether the Forgot Password link is displayed, enabling users to request a password reset.	Default is: ticked Untick to disable	All
Forgot Password Icon	The icon displayed to the left of the Forgot Password link text.	Default is: cv-ico-general-lock	All

Forgot Password Prompt	The text displayed for the Forgot Password link.	Default is: Lost Password?	All
