

# Product Item Widget

## Widget Use

Renders product information in a Product List page. The Product Item widget is employed where 'zoned' product layout is *not* in use.

## Example of Widget Use

Following is an example of the widget in use:

## Where can the Widget be placed?

The widget can be used in the following templates:

- Product List Item Template

## Widget Options

| Option                | Use                                                                     | Comments                                                                                                                                                                                                                                                                                                                                                                                                                      | Available from Version |
|-----------------------|-------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| Description           | A short description of the widget's use.                                | We recommended this field be updated so the widget's purpose is clear at a glance from the template page.                                                                                                                                                                                                                                                                                                                     | All                    |
| Layer                 | The layer the widget is valid for.                                      | <p>The <a href="#">layering technology</a> allows for the content to be shown to specific audiences.</p> <p>This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience, but different configuration is needed.</p> <p>The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.</p> | All                    |
| Show RRP?             | Determines whether the product's Recommended Retail Price is displayed. | <p>Default is: unticked</p> <p>Tick to enable</p>                                                                                                                                                                                                                                                                                                                                                                             | All                    |
| Show Ribbons?         | Determines whether product ribbons are displayed.                       | <p>Default is: ticked</p> <p>Untick to disable</p>                                                                                                                                                                                                                                                                                                                                                                            | All                    |
| Show Quantity Breaks? | Determines whether pricing quantity breaks are displayed.               | <p>Default is: unticked</p> <p>Tick to enable</p>                                                                                                                                                                                                                                                                                                                                                                             | All                    |

|                                         |                                                                                                                                                                                                                        |                                                                                                                                                                                                                 |      |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Show APN Instead Of Product Code        | Determines whether the Australian Product Number is displayed in lieu of the product code.                                                                                                                             | Default is: unticked<br>Tick to enable                                                                                                                                                                          | All  |
| Increase Quantities In Pack Qty?        | Forces the value in the quantity field to increase/decrease in pack quantities when using the plus/minus icons, rather than by the default quantity of 1.                                                              | Default is: unticked<br>Tick to enable                                                                                                                                                                          | All  |
| Show Unit Description?                  | Determines whether unit of issue is displayed.                                                                                                                                                                         | Default is: unticked<br>Tick to enable                                                                                                                                                                          | All  |
| Show Availability?                      | Determines whether stock availability is displayed.                                                                                                                                                                    | Default is: unticked<br><br>Note that when the System setting, EnableStoreAvailabilityClickAndCollect, is in use then this setting is not used. Instead a subset of Delivery and Pickup icons are always shown. | All  |
| Use Role Flag To Hide Availability?     | Determines whether the role flag is obeyed in regard to stock availability display.                                                                                                                                    | Default is: unticked<br><br>Note that when the System setting, EnableStoreAvailabilityClickAndCollect, is in use then this setting is not used. Instead a subset of Delivery and Pickup icons are always shown. | All  |
| Show Quantities?                        | Determines whether available quantity is displayed.                                                                                                                                                                    | Default is: unticked<br>Tick to enable                                                                                                                                                                          | All  |
| Strip Zero Decimal Amounts              | When the price is an even dollar amount, the cents are stripped from the display.<br><br>(For example, \$147.00 would be displayed as \$147)                                                                           | Default is: unticked<br>Tick to enable                                                                                                                                                                          | 3.88 |
| Show Product Options?                   | Determines whether product options (attributes) are displayed.                                                                                                                                                         | Default is: ticked<br>Untick to disable                                                                                                                                                                         | All  |
| Show Top Product Options Add Button?    | Determines whether an Add To Cart button is displayed at the top of the product options grid.                                                                                                                          | Default is: unticked<br>Tick to enable                                                                                                                                                                          | All  |
| Show Bottom Product Options Add Button? | Determines whether an Add To Cart button is displayed at the bottom of the product options grid.                                                                                                                       | Default is: ticked<br>Untick to disable                                                                                                                                                                         | All  |
| Attributed Product Price Display        | The method for calculating pricing of attribute products. Select from:<br><ul style="list-style-type: none"><li>Default Functionality</li><li>Don't Show</li><li>Price From Default</li><li>Price From First</li></ul> | Default is: Default Functionality<br>Select via drop-down                                                                                                                                                       | All  |
| Category URL Prefix                     | The prefix inserted into the category URL before the category name. Primarily used during existing site upgrades to BPD, where it is desirable to maintain existing URLs.                                              |                                                                                                                                                                                                                 | All  |
| Product URL Prefix                      | The prefix inserted into the product URL before the product name. Primarily used during existing site upgrades to BPD, where it is desirable to maintain existing URLs.                                                |                                                                                                                                                                                                                 | All  |
| <b>Titles</b>                           |                                                                                                                                                                                                                        |                                                                                                                                                                                                                 |      |
| Product Options Heading Text            | The heading text displayed above the product options grid.                                                                                                                                                             | Default is: Product Options                                                                                                                                                                                     | All  |

|------------------------|----------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| RRP Prompt             | The label for the RRP field.                 | Default is: RRP                                                                                                                                                                                                     | All |
| Quantity Breaks Prompt | The label for the quantity break display.    | Default is: Multi Buy                                                                                                                                                                                               | All |
| My Price Prompt        | The label for the 'My Price' field.          | Default is: My price                                                                                                                                                                                                | All |
| In Stock Prompt        | The text displayed for available products.   | Default is: In Stock<br><br>Note that when the System setting, EnableStoreAvailabilityClickAndCollect, is in use then this setting is not used. Instead a subset of Delivery and Pickup icons are always shown.     | All |
| Out Of Stock Prompt    | The text displayed for unavailable products. | Default is: Out Of Stock<br><br>Note that when the System setting, EnableStoreAvailabilityClickAndCollect, is in use then this setting is not used. Instead a subset of Delivery and Pickup icons are always shown. | All |

## Other Widgets

- [Order Payment Links Form Widget](#) — Renders an order details stepper with an order form that can be automatically populated with query strings, and/or manually entered by the user. The form doesn't validate the order details are accurate in order to stay both secure and accessible to unauthenticated users.
- [Magic Link Authentication Message Widget](#) — Renders the Magic Link authentication message.
- [CUSTOM\\_Side by Side Content Tiles Widget](#) — Renders two side by side content tiles in a zone with widget options for selecting or adding background colour, image, text and link/button positioning.
- [Stock Dialog Widget](#) — Displays the Stock to Receive Detail dialog window.
- [Stock to Receive Widget](#) — Displays the Stock to Receive page.
- [Stock Levels Widget](#) — Displays Stock Levels page.
- [Order Declined Pending 3rd Party Installment Msg Widget](#) — Renders the message body for the email sent when the user selects to sign up and pay with a Buy Now Pay Later provider but approval is subject to further checks.
- [Order Field Static Widget](#) — Renders an additional order field in email templates.
- [Online Quote Validation Widget](#) — Renders the appropriate message to the user after the current status of an online quote accessed via an email link is validated.
- [Header Level Cost Centre Widget](#) — Renders the cost centre input field on the order header in the shopping cart.
- [Openpay Summary Widget](#) — Renders Openpay marketing information for a product on the product detail page. Use this widget instead of the [Product Purchase Details widget](#) if you want to customise tagline placement on the template.
- [Order Line Availability - Click and Collect Widget](#) — Displays product availability and delivery methods at the order line level in dynamic scenarios such as the cart when Click & Collect is enabled.
- [Account Activation Email Content Widget](#) — Renders the message content in the Invitation to Register an Account email.
- [Order Template Cost Centre Widget](#) — Renders the cost centre input field on each product line in an order template.
- [BPAY Account Payment Detail Widget](#) — Renders BPAY payment information in the body of the BPAY Account Payment email. This email is sent to users who pay invoices or pay down their account balance using BPAY.
