

Widget Device Display Indication: Mobile, Tablet, and Desktop

We have enhanced the "Show on Mobile?", "Show on Tablet?", and "Show on Desktop?" widget display options.

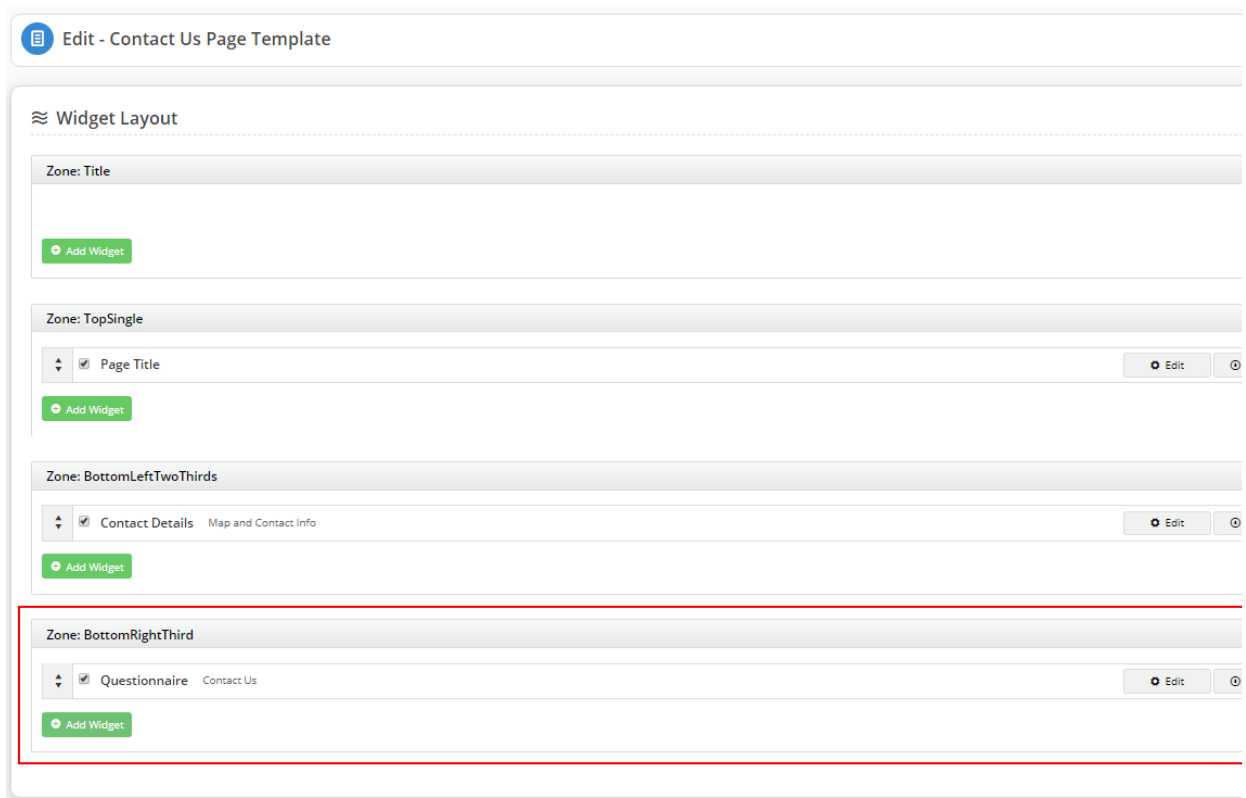

When you toggle one or more of those device type displays to OFF, icons will display on the widget in the page template to indicate what devices will display (or not) that widget's content.

Step-by-step guide

This feature is best described through an example: Displaying the Questionnaire widget on the Contact Us Page on Desktop and Tablet devices but not Mobile devices.

1. *Log into your CMS*
2. *Navigate to Content Pages & Templates Other Pages & Templates*
3. *Edit Contact Us Page*
4. *We have a Questionnaire widget located in the BottomRightThird zone.*

5. *We don't want the Questionnaire widget to display on Mobile devices, so we click on the Common Options tab and toggle **Show On Mobile?** to OFF.*

Questionnaire - Contact Us

General Options

Personalisation

Captchas

Common Options

Documentation

Common Options

Show On Mobile?

☐

Show On Tablet?

☒

Show On Desktop?

☒

Right Align?

☐

Don't Print

☐

Additional Classes

For example, you can add a style sheet class of "new-class" which will then appear next to class

6. Save your changes and Exit.

7. The device icons displayed against the widget tell us on which devices the widget will display or not:

Green: Display

Grey: Do Not Display

Zone: BottomRightThird

Banner Images

In the case of Banner sliders, you can use the same method to configure a banner image to display on any combination of the device types:

- mobile + tablet + desktop
- mobile + tablet
- mobile + desktop
- tablet + desktop

The Desktop, Mobile, and Tablet display options in each individual banner file in Banner Maintenance will show you how the image will appear on the relevant device.

Menu 

Coffee, please

The large banner image can link to one URL, and this subtitle text can contain other [links](#).

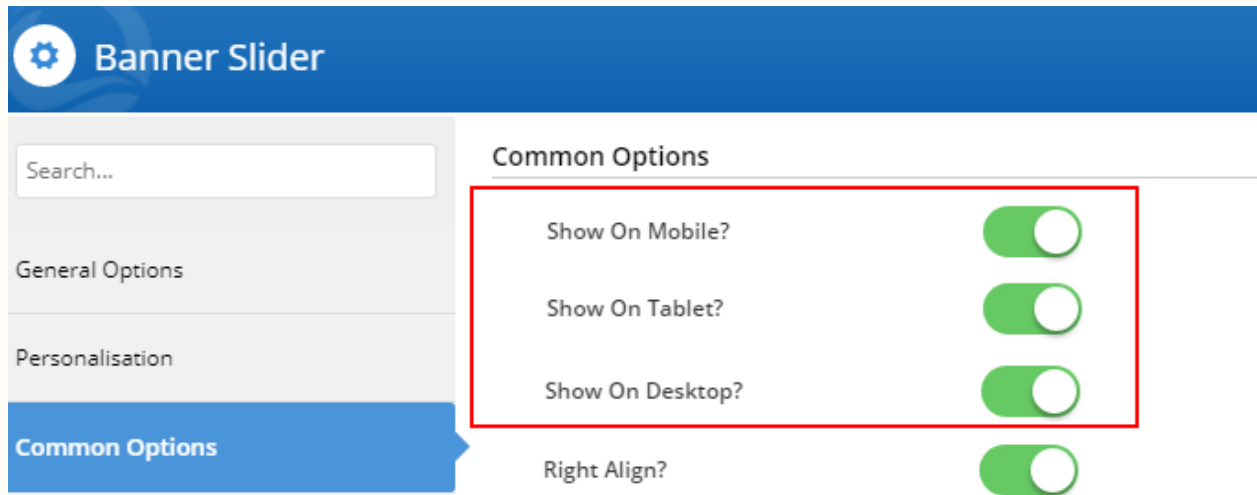

**Sign Up**

The individual **Banner Details: Banner Images** settings takes precedence over the **Show on <device>?** switch in the [Banner Slider widget](#).

For instance, in the above screenshot, you have specified that mobile devices won't display the "Tokyo Food" banner.

If you toggle **Show on <device>?** to ON for all device types in the [Banner Slider widget](#), the "Tokyo Food" banner image will still not show up on mobile devices.

Banner Details: Banner Images settings override the [Banner Slider widget](#) settings.

Additional Information

The new device display toggle options will appear for sites running version 4.15 and above.

Minimum Version Requirements	4.15.00
Prerequisites	--
Self Configurable	Yes
Business Function	Behaviour & Personalisation
BPD Only?	Yes
B2B/B2C/Both	Both
Ballpark Hours From CV (if opting for CV to complete self config component)	Contact Commerce Vision
Ballpark Hours From CV (in addition to any self config required)	Contact Commerce Vision
Third Party Costs	n/a
CMS Category	Layout
