Resources And Template Tokens For Lucene Search

The following Template Tokens and Resources are used to provide information to the user while conducting product searches using Lucene.

Site Administrators can include the Tokens in Search Result Templates, as well as customise the output of the tokens through resource.

Did You Mean

Token	TemplateUtil.ProductSearchQuery_DidYouMean
Use	This token will render the "did you mean" suggestion if one is available, or will render nothing if not.
Resource	rcDidYouMean
Default Resource Value	Did you mean "{0}"?

Partial Word Search

Token	TemplateUtil.ProductSearchQuery_PartialWords
Use	This token will render a message when a partial word search was conducted - meaning that no results were found containing all of the search words entered
Resource	rcPartialWordSearch
Default Resource Value	There were no products that contained all of the words in your query. These products contain some of the words

Search Term Replacement

Token	TemplateUtil.ProductSearchQuery_Modified
Use	This token will render a message when the search term returned no results, and has been automatically modified by a query translation
Resource	rcProductSearchQueryModified
Default Resource Value	Your search for "{0}" returned no results. See our selection below for "{1}"
