

Scheduling the publish of Draft pages

If you've ever made changes to a widget or page template, and wished you could just schedule its publish date, set and forget - you're in luck!

Get the home page ready for your tax time promo with a new banner slider.... Add a message to the cart about stocktake and the possible delays in shipping orders.

Now you can get all your content, images, messaging, and settings configured, then tell the CMS when to send it live!
