Where can the Widget be placed?

The widget can be used in the following templates:

- Offline Order Confirmation Email
- Offline Order Shipped Email

Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommend this field be updated so the widget's purpose is clear at a glance from the template page.	All

Layer	The layer the widget is valid for.	<p>The layering technology allows for the content to be shown to specific audiences.</p> <p>This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience, but different configuration is needed.</p> <p>The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.</p>	All
Email Title	The title text to be displayed.	For an Order Title type, use the placeholder '{0}' to indicate where you would like to display the order number. For example: Order Confirmation #{0}	3.84
Title Type	<p>The context of the title. Select from:</p> <ul style="list-style-type: none"> Content Title (displays within the body of the email) Head Title (displayed on the browser tab when the user views the email in a browser) Order Title (displayed in the body of the email, along with a data source such as order number, e.g. Order Confirmation emails) 	This widget might be present several times within the one email template. For example, once in the 'Zone Head' with a type 'Head Title', once in a content or after header zone with a type 'Order Title', and so on.	3.84
Order Source Inclusions	<p>A comma-separated list of order sources for which to display this title widget on the email. Leave blank to include all.</p> <p>These sources are represented in PRONTO by various characters, in the field so-order-source. Common types are listed in Comments; refer to PRONTO documentation for a complete list.</p>	<ul style="list-style-type: none"> POS order = 'P' Phone order = 'p' Data order entry = 'S' Warranty order = '2' Load sales order = 'I' Internet order = '-' Internet OCI order = 'I' 	3.84
Order Source Exclusions	<p>A comma-separated list of order sources for which to hide this title widget on the email.</p> <p>These sources are represented in PRONTO by various characters, in the field so-order-source. Common types are listed in Comments; refer to PRONTO documentation for a complete list.</p>	<ul style="list-style-type: none"> POS order = 'P' Phone order = 'p' Data order entry = 'S' Warranty order = '2' Load sales order = 'I' Internet order = '-' Internet OCI order = 'I' 	3.84

Note - this functionality requires Integrator version 4.62+.

Other Widgets

- [Order Payment Links Form Widget](#) — Renders an order details stepper with an order form that can be automatically populated with query strings, and/or manually entered by the user. The form doesn't validate the order details are accurate in order to stay both secure and accessible to unauthenticated users.
- [Magic Link Authentication Message Widget](#) — Renders the Magic Link authentication message.
- [CUSTOM_Side by Side Content Tiles Widget](#) — Renders two side by side content tiles in a zone with widget options for selecting or adding background colour, image, text and link/button positioning.
- [Stock Dialog Widget](#) — Displays the Stock to Receive Detail dialog window.
- [Stock to Receive Widget](#) — Displays the Stock to Receive page.
- [Stock Levels Widget](#) — Displays Stock Levels page.
- [Order Declined Pending 3rd Party Installment Msg Widget](#) — Renders the message body for the email sent when the user selects to sign up and pay with a Buy Now Pay Later provider but approval is subject to further checks.
- [Order Field Static Widget](#) — Renders an additional order field in email templates.
- [Online Quote Validation Widget](#) — Renders the appropriate message to the user after the current status of an online quote accessed via an email link is validated.
- [Header Level Cost Centre Widget](#) — Renders the cost centre input field on the order header in the shopping cart.
- [Openpay Summary Widget](#) — Renders Openpay marketing information for a product on the product detail page. Use this widget instead of the [Product Purchase Details widget](#) if you want to customise tagline placement on the template.
- [Order Line Availability - Click and Collect Widget](#) — Displays product availability and delivery methods at the order line level in dynamic scenarios such as the cart when Click & Collect is enabled.
- [Account Activation Email Content Widget](#) — Renders the message content in the Invitation to Register an Account email.
- [Order Template Cost Centre Widget](#) — Renders the cost centre input field on each product line in an order template.
- [BPAY Account Payment Detail Widget](#) — Renders BPAY payment information in the body of the BPAY Account Payment email. This email is sent to users who pay invoices or pay down their account balance using BPAY.
