# **Email Title Offline Order Widget**

## Widget Use

Displays the email title or heading on Order Confirmation and Order Shipped emails for non-web ('offline') orders.

## **Example of Widget Use**

Following is an example of the widget in use:

## Where can the Widget be placed?

The widget can be used in the following templates:

- Offline Order Confirmation Email
- Offline Order Shipped Email

## Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommend this field be updated so the widget's purpose is clear at a glance from the template page.	All

Layer	The layer the widget is valid for.	The layering technology allows for the content to be shown to specific audiences.  This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience, but different configuration is needed.  The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.	All
Email Title	The title text to be displayed.	For an Order Title type, use the placeholder '{0}' to indicate where you would like to display the order number. For example: Order Confirmation #(0)	3.84
Title Type	Content Title (displays within the body of the email)     Head Title (displayed on the browser tab when the user views the email in a browser)     Order Title (displayed in the body of the email, along with a data source such as order number, e.g. Order Confirmation emails)	This widget might be present several times within the one email template. For example, once in the 'Zone Head' with a type 'Head Title', once in a content or after header zone with a type 'Order Title', and so on.	3.84
Order Source Inclusions	A comma-separated list of order sources for which to display this title widget on the email. Leave blank to include all.  These sources are represented in PRONTO by various characters, in the field so-order-source. Common types are listed in Comments; refer to PRONTO documentation for a complete list.	<ul> <li>POS order = 'P'</li> <li>Phone order = 'p'</li> <li>Data order entry = 'S'</li> <li>Warranty order = '2'</li> <li>Load sales order = '('</li> <li>Internet order = '-'</li> <li>Internet OCI order = '['</li> </ul>	3.84
Order Source Exclusions	A comma-separated list of order sources for which to hide this title widget on the email.  These sources are represented in PRONTO by various characters, in the field so-order-source. Common types are listed in Comments; refer to PRONTO documentation for a complete list.	<ul> <li>POS order = 'P'</li> <li>Phone order = 'p'</li> <li>Data order entry = 'S'</li> <li>Warranty order = '2'</li> <li>Load sales order = '('</li> <li>Internet order = '-'</li> <li>Internet OCI order = '['</li> </ul>	3.84

Note - this functionality requires Integrator version 4.62+.

## Other Widgets

- Order Payment Links Form Widget Renders an order details stepper with an order form that can be automatically populated with query strings, and/or manually entered by the user. The form doesn't validate the order details are accurate in order to stay both secure and accessible to unauthenticated users.
- Magic Link Authentication Message Widget Renders the Magic Link authentication message.
- CUSTOM\_Side by Side Content Tiles Widget Renders two side by side content tiles in a zone with widget options for selecting or adding background colour, image, text and link/button positioning.
- Stock Dialog Widget Displays the Stock to Receive Detail dialog window.
- Stock to Receive Widget Displays the Stock to Receive page.
- Stock Levels Widget Displays Stock Levels page.
- Order Declined Pending 3rd Party Installment Msg Widget Renders the message body for the email sent when the user selects to sign up and pay with a Buy Now Pay Later provider but approval is subject to further checks.
- Order Field Static Widget Renders an additional order field in email templates.
- Online Quote Validation Widget Renders the appropriate message to the user after the current status of an online quote accessed via an email link is validated.
- Header Level Cost Centre Widget Renders the cost centre input field on the order header in the shopping cart.
- Openpay Summary Widget Renders Openpay marketing information for a product on the product detail page. Use this widget instead of the Product Purchase Details widget if you want to customise tagline placement on the template.
- Order Line Availability Click and Collect Widget Displays product availability and delivery methods at the order line level in dynamic scenarios such as the cart when Click & Collect is enabled.
- Account Activation Email Content Widget Renders the message content in the Invitation to Register an Account email.
- Order Template Cost Centre Widget Renders the cost centre input field on each product line in an order template.
- BPAY Account Payment Detail Widget Renders BPAY payment information in the body of the BPAY Account Payment email. This email is sent to users who pay invoices or pay down their account balance using BPAY.
