

Select Credit Card Payment Provider

This feature must first be switched on for your site by Commerce Vision.

Braintree Payment credit card settings are not configured on this page. See: [Braintree Credit Card Settings](#)

If your site uses [Braintree Payments](#) and it has been enabled to display Braintree only for processing credit card transactions, the payment provider selected here will not be available to customers during checkout.

Provider Selection

Specify the provider to use

Your site is using Braintree so it may be configured to only show the Braintree payment options.

Payment Provider lets you select the credit card processing provider for your website. Except [Braintree Payments](#), all providers integrated to the Commerce Vision platform are listed. If your site uses a [current Eway gateway method](#), you can also enter the [API keys](#) and [configure settings](#) here.

- [Get Eway API Keys](#)
- [Configure Eway settings](#)

This setting replaces the **Card Payment Provider** selection located in Settings while logged into your website.

The deprecated **Card Payment Provider** setting is located in **Settings Orders Credit Cards**. Do not use this setting.

Cards Accepted

C/Card Payment Provider (Moved to Setting Def) : MigratedToSettingsDef (Inactive)

Step-by-step guide

NOTE - This guide assumes that credit card payment is enabled for your site. If it is not available, please contact [Commerce Vision](#).

1. In CMS, navigate to **Settings Feature Management Payment & Checkout**.

2. Toggle **ON** **Payment Provider** and click **Configure**.

3. In **Provider Selection**, select the payment provider from the list.

If your site is version 4.31+, the **Overrides** facility can be used to select different providers against Roles or Users.

4. For some providers, configuration settings can be completed here. If available, fields will automatically display after the payment provider has been selected.

5. Click **Save** or **Save & Exit**.
