

Braintree Google Pay Settings

Braintree Payments

Refer to the [documentation](#) on Braintree Payments for other help topics.

CV ecommerce Braintree Payments gateway is integrated to accept Google Pay. Google Pay allows users to make contactless payments online and with Android phones, tablets or watches. Your business must have a Google Pay account set up and Google Pay must be enabled in your Braintree account.

NOTE - Google Pay is available in Google Chrome v61 or higher on Android. If Google Pay is not supported by the customer's browser, the option to select Google Pay will not appear.

Sandbox testing

For Sandbox testing, Google Pay requires a real credit card. However, no funds will be taken from the card during processing and the card is not saved.

Configure Google Pay Settings

To configure Braintree Google Pay Settings:

1. Navigate to **Settings Payment & Checkout Braintree Payment**.

2. If the **Available in CMS** toggle is not enabled, toggle it ON.

3. Click **Configure**.

4. Scroll down to **Google Pay Settings**.

5. Toggle ON **Enable Google Pay**.
6. In **Google Pay Merchant ID**, enter your Google Merchant ID from your Google Merchant Centre account. **TIP** - if you are testing in Sandbox, this can be left blank.
7. To save your settings, click **Save**.

When Google Pay is enabled on your site...

In the Payments panel during checkout, 'Google Pay' displays as an option under Payment Methods.

Once logged in, the secure Google Pay popup is displayed. The User selects an existing payment option or enters a new credit card.

The screenshot shows the Google Pay interface for adding a new card. At the top, there is a back arrow, the text "Google Pay" and "pay.google.com", and the Google Pay logo. Below this is a user profile section for "Jane Smith" with the email "jane.smith.cv123@gmail.com" and a dropdown arrow. The main section is titled "Add new credit or debit card". It features a "Card number" field with a blue hash symbol (#) on the left and icons for American Express, Mastercard, and Visa on the right. To the right of the card number field are fields for "MM / YY" and "CVC". Below the card number field is the "Cardholder name" field, which contains the text "Jane Smith". Further down is the "Billing address" field with a location pin icon on the left. At the bottom, there is a paragraph of text: "By continuing, you agree to the Google Payments [Privacy Notice](#) & [Terms of Service](#). You also agree to receive the [Product Disclosure Statement](#) for your Google Payments account by hyperlink." and a blue "CONTINUE" button.

Once saved, the User is returned to the Payment panel on your website with the Google Pay option selected. The User clicks **Process Payment** to complete payment for the order.

The screenshot shows a "Payment" panel on a website. At the top, there is a "Payment" header with a diamond icon. Below this is a "Payment Methods" section with two tabs: "Payment Methods" and "BPay". The "Payment Methods" tab is active. Under this tab, there is a section titled "Paying with Google Pay". Inside this section, there is a green-bordered box containing the Google Pay logo and the text "Google Pay". Below this box is a link that says "Choose another way to pay". At the bottom of the panel, there is a green button with a card icon and the text "Process Payment".
